

Bored with nothing to do? Want to watch a movie but can't decide? Introducing Disney Dinners! This new app will help you to entertain the kids as well as feed them a fun dinner that goes right along with the movie! You can choose or you can have it be random and choose for you!

My 3 assumptions are:

1. It is hard to figure out what movie to watch.
2. There is a lot of indecision for figuring out what to eat.
3. There are too many options!

Motivations:

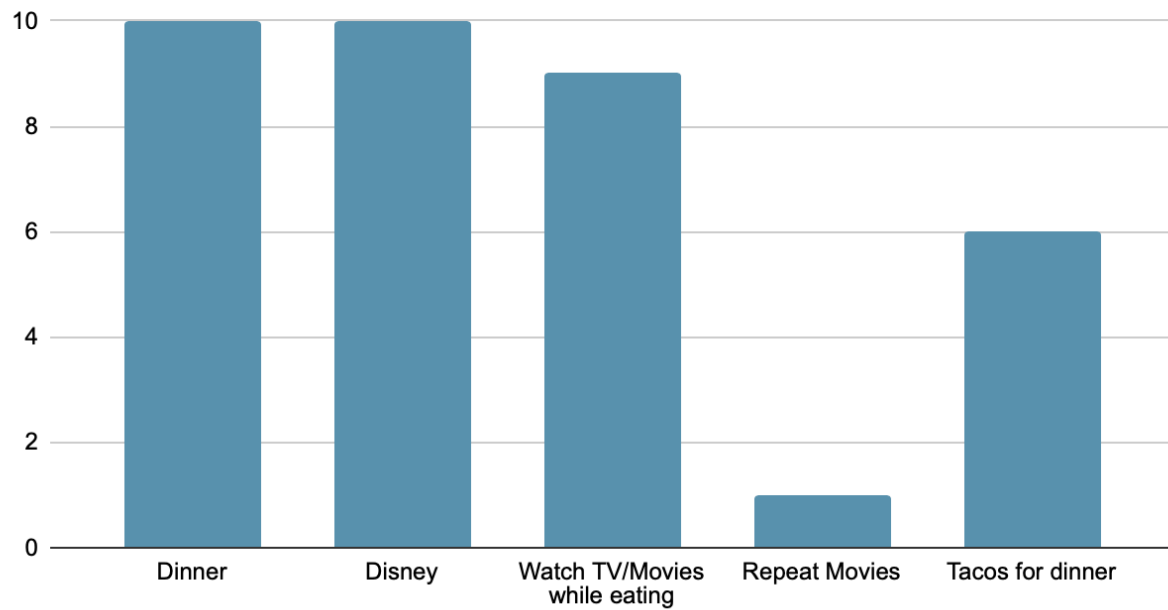

1. The app can choose for you!
2. Fun date night in that you most likely won't have to spend any extra money on
3. Cheap option that makes you get creative!
4. Easy entertainment!

Analyze and Report

1. Everyone likes dinner and disney.
2. Most people prefer tacos, Meat with a side of vegetables.
3. Not everyone watches TV/ Movies while eating.
4. Not a single movie was said twice.

I think I was able to answer my problem statements/ assumptions. It helps to narrow down what kind of movie people would be interested in and what to eat with said movie.
